

General

Importing NAS shares with images into the library

PictureGuide can read images from hard drives, removable drives, and NAS or server shares.

Since PictureGuide 24.03, images on shares can be read in via UNC path (e.g. \\NAS\Multimedia) as well as via an assignment by drive letter.

Instructions for using UNC paths: [Importing images into the library](#)

[Google Search "Connect Network Drive"](#)

[Notes if you want to put the PictureGuide database on NAS.](#)
