Import images from your smartphone

There are several ways to save the pictures from the smartphone to the PC.

For Android models:

- [Sync with GoogleDrive](#)
- [Dubbing by cable](#)
- [Radio transmission via app](#)

For Apple models:

- [Radio transmission via app](#)
- [Dubbing via cable](#) (no Favorites, Captions and Albums)
- [Sync via iCloud](#) (No LivePhotos, No Favorites, Captions, and Albums)

Short hints on this can also be found in PictureGuide under **Settings - Import**.

Notes for the recommended PhotoSync app

The [PhotoSync app](#) is ideal for syncing between Apple smartphones and Windows devices. This allows you to transfer the mark as favorite, subtitle and album to the computer, as opposed to transferring via iCloud or cable.

The following settings are recommended for this from PictureGuide onwards:

General

For the transfer of the album assignments, make a setting in the tagging. Manually add the Album custom tag. Thus, the album assignments in PictureGuide are identical to the smartphone.
