

Operation

Compare and sort out images

PictureGuide offers various functions to compare and sort out similar shots.

You can get an overview of the possibilities via PictureGuide > **Sort Out**.
Select the desired category here.

- **Duplicates:** Find identical images in different directories
- **Similarity:** compare similar shots in a certain time frame
- **Out of focus:** sort out any blurred shots and check alternatives
- **Motive value:** no good or concrete motive could be identified

To compare images directly in the search view, press the < **key** or click on the **Compare images** icon in the **right sidebar**.

Operation Image Comparison

Operation

Operation

- In the **left selection**, the source image is selected for comparison.
- PictureGuide lists similar shots as candidates at the bottom
- The **Sorted button** switches between best picture and time interval
- For a better comparison, **select** some **images** in the lower area (Shift/Ctrl + mouse)
- Selected images appear in the overview and are zoomed and moved in parallel
- Parallel zooming/panning can be deactivated via the **Synchronous button** or holding the **Alt key**
- For good shots, use the mouse to switch the icon between **X (delete)** and **tick (keep)**
- To mark all candidates on Keep in advance, press the **All OK button**
- Once you have made your selection, click the **Run button**
- The images with erase marker are now deleted from the hard drive (or into the trash)
